## SUMMARY

---

I am a full stack developer and Dev Bootcamp graduate. As a recent coding bootcamp graduate, I know more than specific technologies—I know how software is built, how to think about technical problems, and how to collaborate on code. I am able to develop with many technologies, including Ruby, Rails, JavaScript, Node, Angular, and more. Dev Bootcamp not only taught me the technical skills to become a developer, but also gave me the confidence, soft skills and experience of working in an agile environment where quick iterations and good feedback are a way of life. I plan to use these skills to build things that make the world a more enjoyable place.

## SKILLS

---

**WEB DEVELOPMENT:** Ruby, Ruby on Rails, Sinatra, JavaScript, jQuery, Node.js, AngularJS, HTML, CSS

**TOOLBOX:** Git, Github, SQL, ActiveRecord, RSpec, Restful APIs, JSON, jQuery

## BOOTCAMP

---

### Dev Bootcamp

Web Developer Apprentice · San Francisco

- Dedicated 19 weeks and over 1000 hours in coding challenges and group projects.
- Built web applications in Ruby and JavaScript using MVC, RESTful, and object-oriented design patterns.
- Practiced pair programming in an AGILE environment, learning git workflow, and how to give and receive effective feedback.

## PROJECTS

---

### CloudScript

- Web and mobile application to aid doctor and patient communication through video chat.
- Allows patients to have prescriptions delivered in under 90 minutes through Walgreens, CVS, and Postmates API.
- In one week, learned and utilized foreign technologies including io.js, AngularJS, Ionic, Node/Express, MongoDB, Gulp, WebRTC and AWS.

### Midnight Munchies

- Solo project that allows users to find late night, cheap eats in a one mile radius of current location.
- Used Yelp and Google Places API to gather data about nearby restaurants.
- Made in Ruby, Sinatra, PostgreSQL, ActiveRecord, HTML5/CSS, and jQuery.

### Sudoku Solver

- A sudoku solver made using Ruby.

### Mini About Me

- A web app with a little more about me.
- Made in Rails and Bootstrap.

## EDUCATION

---

### University of Wisconsin - Madison

B.S. Economics 2012

### Sogang University - Seoul, South Korea

2013

Developed Korean conversational fluency in 10 week course.
